

Move Beyond the Lighting Console with nManager Mobile

Key Features & Benefits

Control lights on an individual or a group basis.

Monitor occupancy levels.

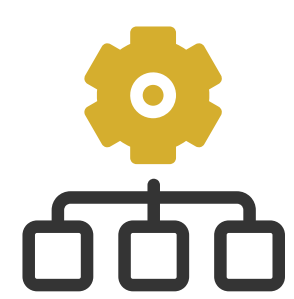

View schedules and configuration.

View all activity logs.

Utilize an easy-to-navigate user interface.

Clarify structure through grouping of rooms.

Activate/override daylight controls.

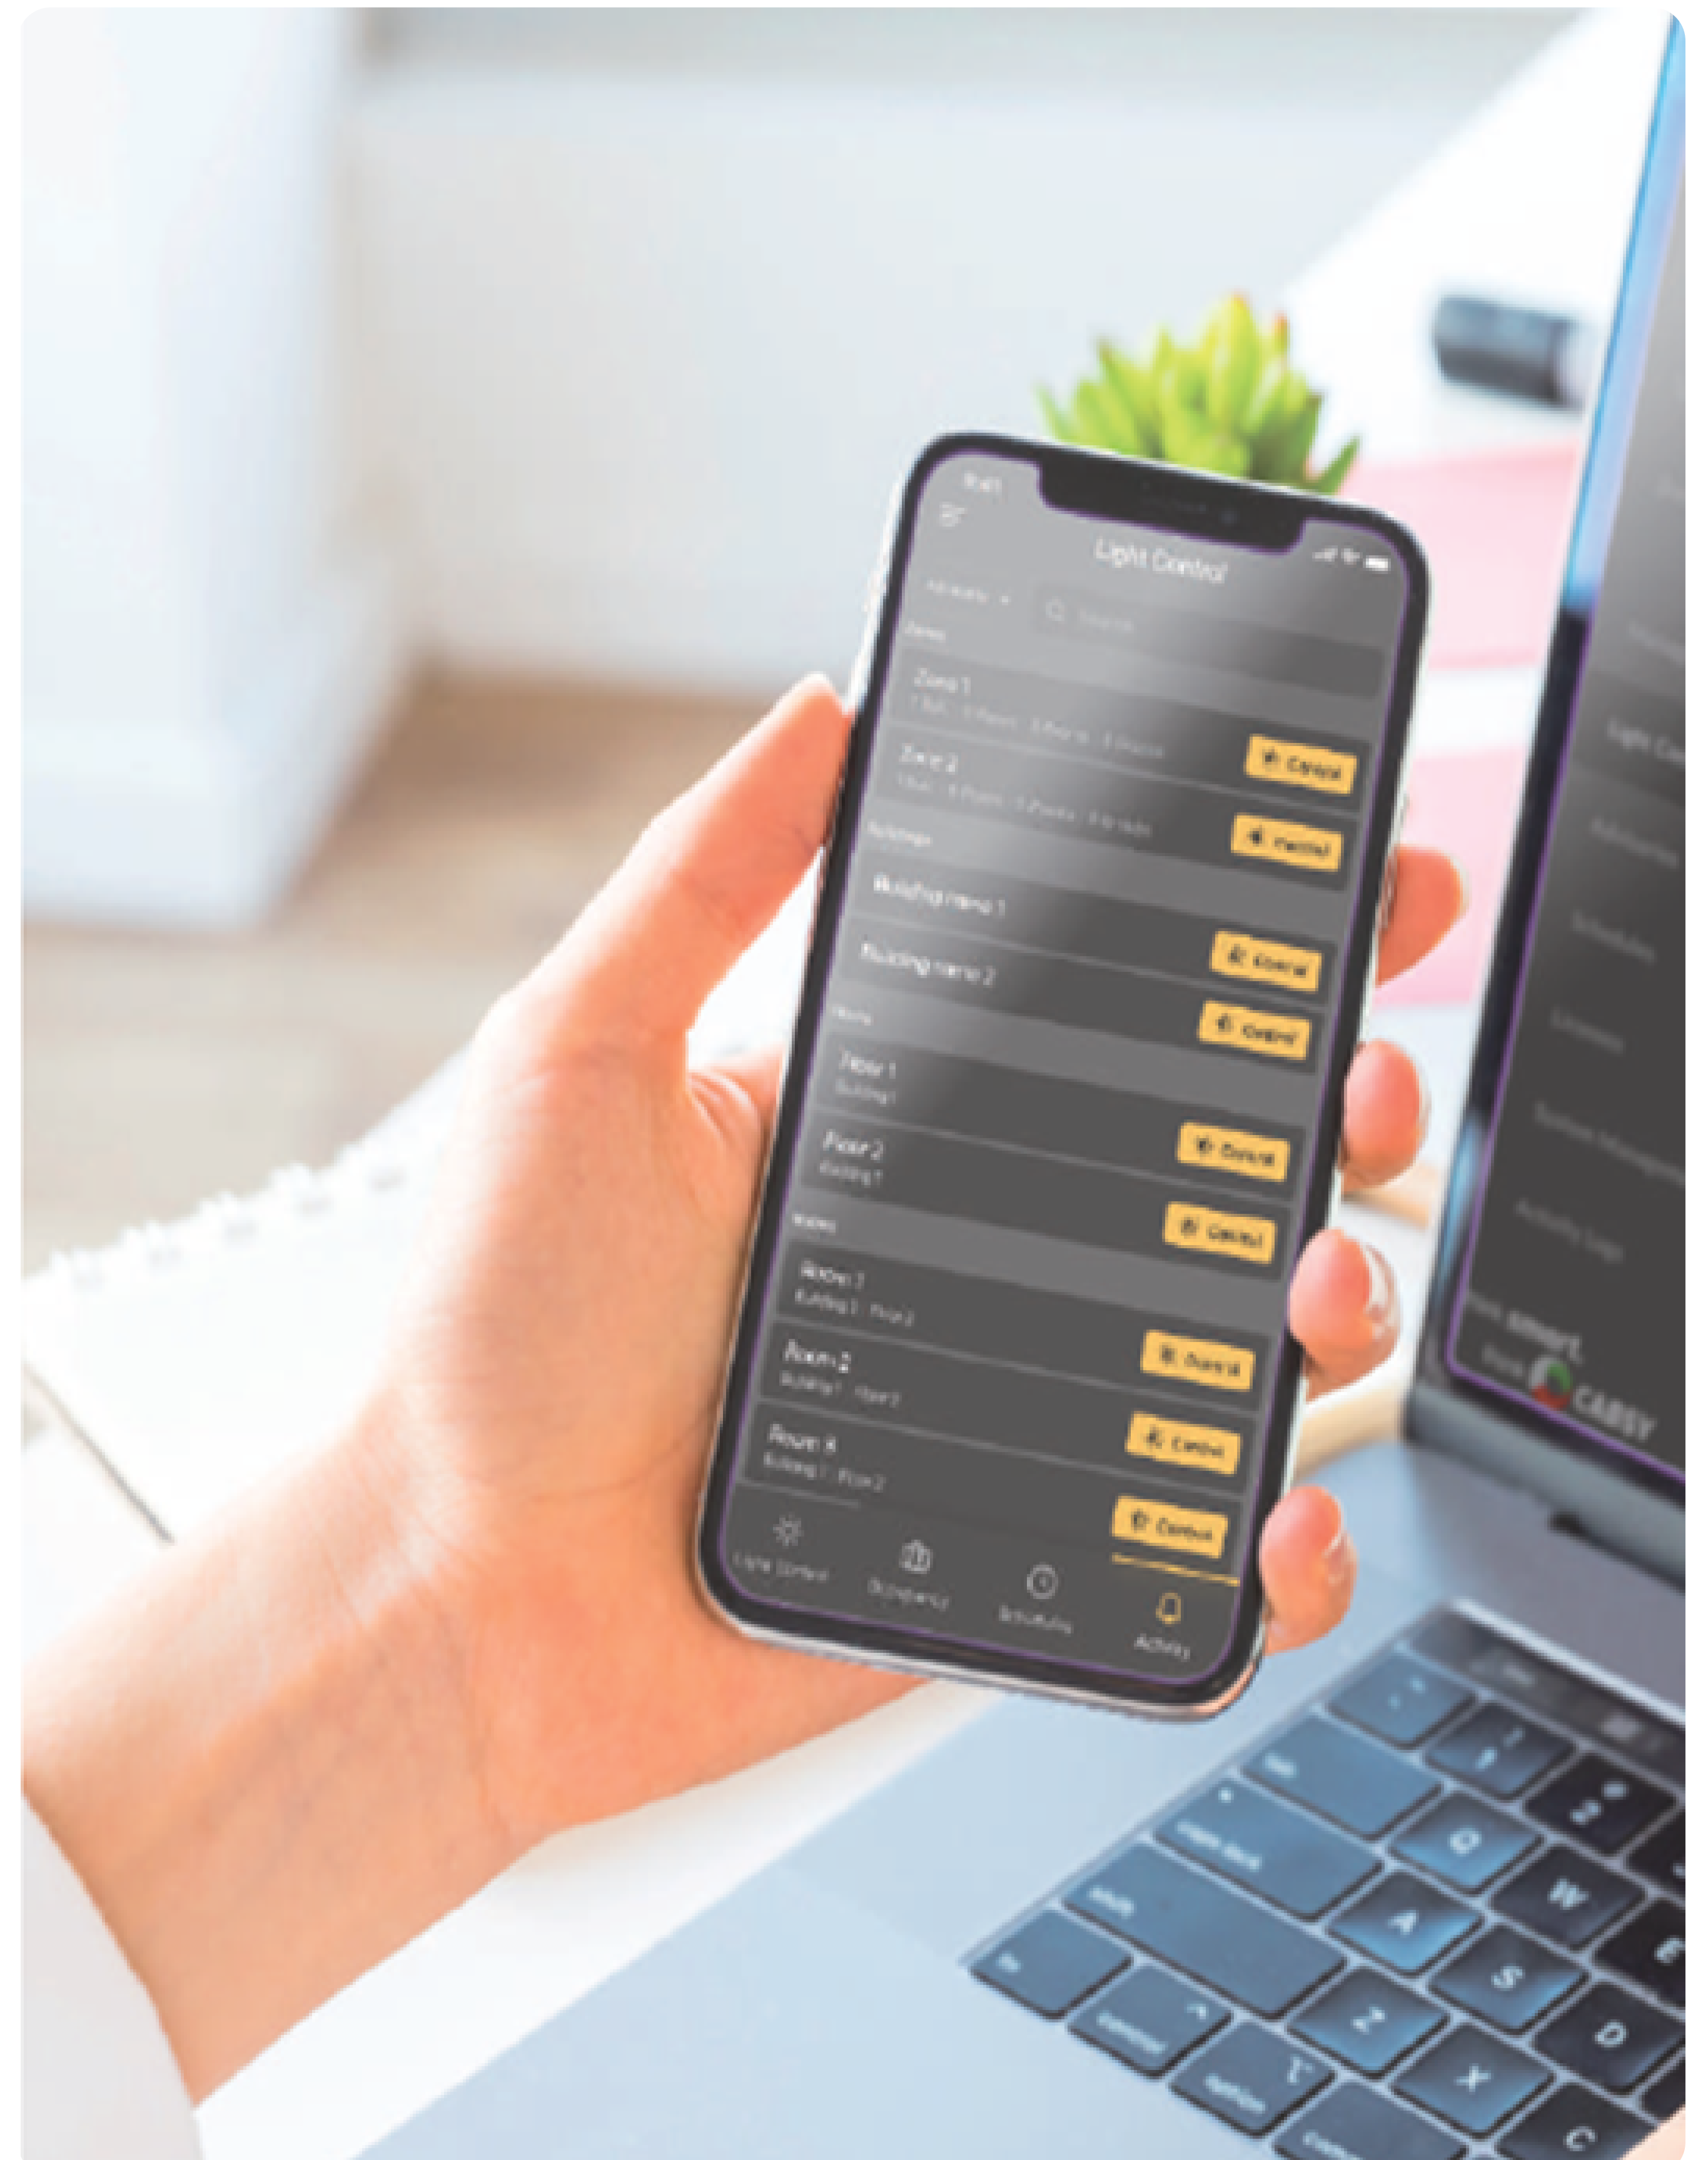

Control colored light (RGB).

Scale from a single LED fixture to a wide range of fixtures.

Control commercial and industrial lighting from the palm of your hand.

With nManager Mobile, it's easier than ever to manage lighting activities through a wide range of functionalities for a precise light level every time. An on-screen dimming bar gives you smooth control for full-range dimming.

ABOUT

nLUMINAIRE is a PoE Connected Lighting System that uses ethernet cable to transmit DC power and data to efficiently power, monitor, and control LED light fixtures. It reduces installation and operating costs and lowers carbon footprint while enhancing safety and security. By implementing this elegant lighting system, both commercial and industrial buildings are becoming smarter and more sustainable.
